

Questions for the Business Advisor

Battle Room · solo founder · Idaho LLC · B2B software subscription (SaaS)

Lead with these three — most likely to bite you and hardest to fix later: 1) Sales tax on SaaS (Idaho + other states) · 2) Quarterly estimated taxes · 3) Keeping the LLC liability shield intact.

Then ask: **"If I could only do three things before launch, what would they be?"**

ENTITY & FORMATION

- Single-member LLC now vs. S-corp election later — at what revenue does S-corp start to save me money?
- Do I need a registered agent — me or a service?
- Idaho filings, fees & annual report requirements to stay in good standing?
- Do I need a state or Canyon County / city business license to run a SaaS?
- Should I get an EIN even as single-member? (Why / why not.)

BANKING & LIABILITY SHIELD

- What do I need to open a business bank account?
- What specifically puts my personal assets at risk ("piercing the veil") — and how do I avoid it?
- How should I pay myself — owner's draw vs. salary?

TAXES (PRIORITY)

- How is a single-member LLC taxed — what will I owe (federal, Idaho, self-employment)?
- Do I owe quarterly estimated taxes, and how do I calculate them?
- Sales tax on my subscription — taxable in Idaho? What about out-of-state customers ("economic nexus")?
- What expenses can I deduct (hosting, software,

insurance, home office, legal)?

- Accounting software from day one — which?

CONTRACTS & LEGAL

- Should a lawyer review my Terms of Service & Privacy Policy before real customers — rough cost?
- I collect user data + process payments (Stripe) — what privacy/data obligations am I missing (CA + other states)?
- My subscriptions auto-renew — what auto-renewal disclosure laws must I follow?
- Is click-to-agree on my Terms enough, or do customers need to sign something?

INSURANCE & RISK

- What insurance does a SaaS actually need — Tech E&O, Cyber liability? Realistic cost?
- Get it before my first paying customer, or at some threshold?

PAYMENTS & RECORDS

- Stripe specifics — tax reporting (1099-K), chargebacks, refund handling?
- What records must I keep, and for how long?

Always ask: "For a solo founder launching a B2B software subscription in Idaho, what do people in my position most commonly get wrong or forget?" | **Notes:** jot their answers next to each box — flag anything that surprises you to follow up on.
